

## QUALITY POLICY

At BEPL, we are committed to providing exceptional environmental solutions that align with our core business values and objectives. Our policy is specifically tailored to the environmental services we offer, **including EIA/EMP/NOC, compliances, and all related services**. We focus on delivering high-quality technical solutions that are aligned with the goals of our business and meet the regulatory and customer requirements in the environmental domain.

BEPL is dedicated to the on-going improvement of our processes, products, services, and training programs. We encourage a culture of innovation and excellence, striving for continual growth and the optimization of our environmental solutions to consistently **enhance customer satisfaction**.

Our Quality Management System (QMS) provides a **clear framework for setting measurable objectives**, ensuring alignment with our business goals. We conduct **regular reviews of our performance, objectives, and customer feedback** to ensure that we meet and exceed expectations.

This commitment is shared and communicated to all employees and stakeholders and is an integral part of the fundamental values of our company. We shall achieve this by **continual improvement of Processes, Products, Services**, employees training & Quality Systems to meet the customer's expectations and thereby establish a long-term association.
